Nursing and Allied Health Professions including all therapists and health care assistants

The purpose of this information is to help you decide if you need any workplace adjustments to help you achieve the full remit of your job role. If you are unsure about any of the information below you may contact the Occupational Health Service on 020 3317 3350 and ask to speak to one of the Occupational Health Nurse Advisors. You may also contact your recruiting manager if you are unsure about any aspect of your job/role or workplace.

Effect of health condition	Impact on work	Adjustments/support
Health conditions that	Health care work generally involves a	Most musculoskeletal problems are minor and resolve with or without treatment.
affect mobility, dexterity	lot of physical activity i.e. walking,	Some chronic problems may require adjustments if mobility, strength, function or
e.g. Musculoskeletal	standing, pushing, pulling, helping	flexibility is impaired.
problems (back, neck,	patients to move and transfer and	If you require adjustments to your work station due to musculoskeletal problem, these
joints)	working with computers (Display	can be arranged as long as they are operationally feasible.
	Screen Equipment (DSE)).	
Heath conditions that	Health care work can be busy and	Support is available from the Employee Assistance Programme, Occupational Health
can affect	pressurised at times.	and your manager.
concentration,	Starting a new job or being newly	Please declare all mental health problems (including work related stress) by choosing

thinking		Questionnaire to complete so you can tell us more details. You may be contacted by
e.g. Stress, Mental health		an OH adviser for a confidential discussion. Adjustments may be recommended.
problems		
Health conditions that	Patient care involves a lot of hand	Those with a pre-existing skin problem may need adjustments. Alternatives to most
affect skin	washing, using soap, hand cleansers	products can be found to accommodate skin issues. Temporary adjustments may be
e.g. eczema, dermatitis,	and gloves. Working with broken skin	made for those with broken skin on their hands.
allergies, psoriasis	on hands is an infection control risk.	Those with suspected allergies may be referred for allergy testing.
Health conditions that	Health care work often involves working	For most people it takes a little time to get used to shift patterns i.e. change in dietary
can cause sudden	shifts (including nights) which may have	and sleep patterns. This may be made more difficult by some health conditions.
collapse or need regular	an impact on some health conditions.	Temporary or permanent adjustments may be required. Please declare all health
life pattern to control	This is especially important if you have	conditions that may be affected by shift work.
e.g. Diabetes, epilepsy,	not worked shifts before.	
heart conditions		
Conditions that cause	Most patient care involves record	Please declare dyslexia so that Occupational Health can assess the impact that this

difficulty with reading, writing e.g. Dyslexia Health conditions that cause sensory problems e.g. hearing, sight (that are not corrected by spectacles or lenses)	keeping, calculations, reading complex medical information and processing complex information under pressure. There are some health care roles that are more easily adapted for those with sensory deficits than others. There may be some health and safety considerations ie fire safety, access.	 may have on the proposed work. You may be asked to provide an educational psychologist's report to ensure that appropriate adjustments can be recommended (where necessary) An assessment will be undertaken in regard to any sensory deficit that may impact on the safety of staff or patients. A work place assessment may be required and on occasion the Access to Work team will be involved if significant adjustments are required.
Blood borne viruses (Hepatitis B, Hepatitis C, and HIV)	Dental nurses require clearance to practice Exposure Prone Procedures (EPP).	All health care workers who are infected with a blood borne virus have a legal and ethical duty to inform Occupational Health in strictest confidence. Adjustments for EPP workers may be required.
Infectious diseases or susceptibility to them	Health care staff are sometimes exposed to infectious diseases such as TB, measles, chickenpox, rubella. The Trust also has a duty to protect patients from catching infectious diseases from staff.	All health care staff must bring details of their immunisations and blood test results to the OH department for the New Entrant check. The OH team will assess whether or not further vaccinations or blood tests are required to protect the health care worker and the patient. If you have a condition that lowers your immunity to infections (including HIV), you must inform Occupational Health so that adjustments can be made.
ТВ	You must tell Occupational Health BEFORE you commence work if you have any symptoms of TB. By signing the declaration below, you are confirming that you are symptom free.	 Symptoms of TB Have a cough that has lasted more than 3 weeks Have lost weight (not as part of a weight loss programme) Are coughing up blood Have night time sweats Have a fever associated with the above symptoms.
Any other health condition that may impact on your role (please see job description)	Some health conditions may be exacerbated by working as a nurse or impact on your ability to perform all of your duties.	You may discuss any health condition that you think may affect your work, in confidence, with the OH team. Where operationally feasible, adjustments will be made to help you achieve your full potential in the workplace. Specific health conditions are not discussed with any third party without your consent.
New or expectant mothers.	Whilst not a health problem, new or expectant mothers have a legal right to a work place risk assessment to ensure that they are not exposed to hazards in the work place that may pose a risk to	You should inform your manager in writing that you are pregnant. On receipt of this information, your manager will undertake a risk assessment. If any risks/hazards are identified, adjustments will be made to minimise/remove them. This may or may not include the OH department. If you would like confidential advice in regard to work and pregnancy, you may self-refer to Occupational Health.
Sickness absence	The trust will be asking your referee	If your sickness absence record gives your recruiting manager cause for concern or if

records	your absence hits one of the trigger points in the CIFT sickness and absence policy, you may be referred to Occupational Health. This is to establish if there is an underlying health issue and if the Trust needs to make any reasonable adjustments for you.
